

# FUSIONMASTER® LF110

## Features

- Compact for narrow trench work.
- Robust, reliable and low maintenance.
- Ultimate flexibility: Reducing Liners and Clamps removable and interchangeable.
- Heater provides controlled uniform surface temperature.
- Fast set up. Heater reaches working temperature in approximately 10 minutes.
- Replaceable non-stick Heater Cloth system reduces downtime.
- Joints rapidly prepared with the powerful electric Facer.
- Weld pressure is applied by “torque wrench” style lever.

Please note that this machine is not suitable for weld pressure calibration.

## SPECIFICATIONS

### Component Data

|                       |                              |       |
|-----------------------|------------------------------|-------|
| Butt Machine          | 260L x 250W x 350H (mm)      | 7.2kg |
| Heater Plate          | 750 W, 240 Vac               | 2.3kg |
| Facer                 | 750 W, 240 Vac               | 4.0kg |
| Pipe Clamp Liners     | Imperial & metric up to 90mm |       |
| Fittings Clamp Liners | Imperial & metric up to 90mm |       |
| Heater/ Facer Stand   |                              | 2.5kg |
| Accessory Case        | 760L x 310W x 295H (mm)      |       |

Recommended generator for field use is 2.0kVA, 240V, single phase
